PROFESSIONAL EXPERIENCE

Instructor

CyberChallenge (Cybersecurity National Lab, CINI) 🔗

02/2023 – Present

Perugia, Italy

- Deliver hands on training in web security, secure software development and cryptography; mentor students during labs, CTF exercises and code reviews.
- Build vulnerable applications and educational labs using Python, Flask/Django, JavaScript, Jinja2 and Docker.

Web developer (Internship)

Cybertech.eu 🔗

02/2023 – 04/2023

Rome, Italy

- Developed and containerized intentionally vulnerable web applications for cyber range training using Python, Flask/Django, JavaScript, Jinja2 and Docker.
- Contributed to training environments and scenarios focused on common web vulnerabilities and secure coding.

EDUCATION

MSc in Computer Science and Engineering (LM-32)

Politecnico di Milano 🔗

09/2023 – Present

Milan, Italy

Bachelor's degree in Electronic and Computer engineering (L-8)

Università degli Studi di Perugia 🔗

09/2019 – 06/2022

Perugia, Italy

SKILLS

Programming

Languages

Python, Java, C,
JavaScript, SQL, Go

Frameworks

Flask, FastAPI, React,
NodeJS, Django

DevOps & Tools

Git, Docker,
Kubernetes, NGINX,
Linux, AWS

AI Frameworks

LangChain,
LangGraph, MCP

LANGUAGES

Italian: C2, English: B2

PROJECTS

Ctf-ad-agents

05/2026 – Present

- Multi-agent assistant for Attack & Defense CTFs. Designed a LangGraph supervisor coordinating agents for traffic analysis, patching and exploit generation/execution.
- Integrated three custom MCP servers and a human-in-the-loop approval flow.
- Deployed with Docker and Kubernetes.

Tech: Python, LangGraph, LangChain, MCP, Docker, Kubernetes

BestBikePaths

10/2025 – 02/2026

- Developed a system to collect, validate, and visualize cycling path information. Combined user-generated reports with automated validation mechanisms.
- Designed to help cyclists identify safer and higher-quality routes.

Tech: React, Node.js, PostgreSQL, Prisma, Docker

Galaxy Trucker

06/2025 – 09/2025

- Distributed LAN multiplayer game with JavaFX and CLI clients, RMI/TCP networking, MVC, asynchronous message queues, client reconnection and persistent game state.

Tech: Java, JavaFX, Java RMI, TCP sockets, MVC
